SARA NASIR

Full Stack Developer

sarahnasir545@gmail.com | linkedin.com/in/sarah-n-610b20244 | Lahore, Pakistan | 0315-1559625

PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of hands-on experience building production-grade web applications across ride-hailing, food delivery, and lifestyle tech domains. Proficient in React.js, Next.js, Nest.js, Node.js, and PostgreSQL. Skilled in REST API integration, state management with Redux RTK Query, and cloud deployment on AWS and Vercel. AWS Certified AI Practitioner. Strong collaborator in Agile teams with a track record of owning modules end-to-end and delivering clean, scalable, and performant code.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Tailwind CSS, HTML5, CSS, SCSS, JavaScript (ES6+), TypeScript
Backend: Node.js, Nest.js, RESTful API Design & Integration
Databases: PostgreSQL, SQL, NoSQL
State Management: Redux Toolkit, RTK Query
Cloud & DevOps: AWS (SageMaker, Rekognition, Lex), Vercel, Docker, GitHub, Jira, Planner
Methodologies: Agile, Scrum, Code Reviews, Responsive Design
Tools: Git, GitHub, Cursor, Figma (collaboration)

PROFESSIONAL EXPERIENCE

Full Stack Developer | **NETSOL Technologies Inc.** | January 2026 – Present | Lahore, Pakistan

- Built responsive web interfaces using Next.js SSR/SSG, improving page load performance by 30–40% compared to CSR equivalents.
- Manage application state and API data using Redux Toolkit and RTK Query, implementing efficient caching and synchronization patterns.
- Collaborate cross-functionally with designers, backend developers, and QA in Agile sprints using Jira, Planner and Git.
- Participate in code reviews and contribute to engineering best practices across the frontend team.

Associate Full Stack Developer | **Tekrowe** | July 2024 – November 2025 | Islamabad, Pakistan

- Delivered 3 full-stack production applications end-to-end across 16 months — from UI design to backend integration — using React.js, Next.js, Nest.js, and PostgreSQL, spanning ride-hailing, food delivery, and lifestyle tech domains.
- Owned key feature modules across multiple client projects, making architectural decisions and resolving complex technical issues independently.
- Integrated third-party REST APIs for real-time data handling and implemented role-based access control (RBAC) for secure multi-user systems.
- Participated in agile ceremonies, peer code reviews, and cross-team discussions to align on deliverables and maintain code quality.

Full Stack Intern | **Ineffable Devs** | May 2022 – July 2022 | Islamabad, Pakistan

- Gained hands-on experience in web application development and testing across multiple live projects.
- Assisted senior developers in building and debugging features, contributing to both frontend and backend codebases.

KEY PROJECTS

Zoom Cars – Ride-Hailing Admin Portal | July 2024 – November 2024

Tech Stack: *React.js, TypeScript, Tailwind CSS, Nest.js, PostgreSQL, REST APIs*

- Built the admin portal for a large-scale ride-hailing platform (similar to Uber/InDrive) handling real-time fleet and user operations.

- Contributed to 6 core admin modules (ride management, driver assignment, dispatch, bookings, users, dashboards) for a platform handling hundreds of daily ride operations.
- Integrated REST APIs for real-time ride status updates and user action flows in coordination with the backend team.
- Collaborated with backend engineers to align on data structures, ensuring seamless API contracts and consistent state management.

Foodies First – Food Delivery Admin Platform | November 2024 – January 2025

Tech Stack: *Next.js, TypeScript, Tailwind CSS, REST APIs*

- Designed and shipped an end-to-end admin dashboard for a food delivery service covering orders, menus, locations, and user roles.
- Developed reusable UI component library and implemented role-based access control (RBAC) for multi-level admin permissions.
- Integrated REST APIs for dynamic data handling and ensured full mobile responsiveness across all device breakpoints.

On Your Clicks – Baby Name Discovery Platform | February 2025 – November 2025

Tech Stack: *Next.js, TypeScript, Tailwind CSS, Nest.js, PostgreSQL, Redux RTK Query*

- Architected and developed a feature-rich baby name platform with smart filtering, multilingual support, and personalized family tree generation.
- Built a real-time polling system allowing users to create and share name polls with friends and family for collaborative feedback.
- Integrated birthday tunes and rhymes per name to enhance user engagement; managed complex state with Redux RTK Query for data persistence.
- Delivered a fully responsive, intuitive UI with a seamless user experience across web and mobile devices.

Roda BI – Business Intelligence (BI) & Data Analytics platform | January 2026 – Present

Tech Stack: *Next.js, TypeScript, SCSS, REST APIs, Java*

- Contributed to a 6-year-old enterprise BI platform — built the landing page, integrated REST APIs, implemented free drag-and-drop layout across dashboard sections using react-grid-layout, and resolved bugs across the full application.

EDUCATION

Bachelor of Science in Software Engineering

COMSATS University Islamabad | September 2020 – June 2024 | CGPA: 3.6 / 4.0

CERTIFICATIONS & ACHIEVEMENTS

AWS Certified AI Practitioner – Amazon Web Services | August 2025

Covers foundational AI/ML concepts and AWS AI services including SageMaker, Rekognition, and Amazon Lex etc.

1st Position – Web Category, Final Year Project (FYP)

Developed an award-winning interior design application using Three.js with immersive 3D visualization capabilities.
